DataNova Consulting LLC

Private AI, automation & self-hosted infrastructure

Service-Disabled Veteran-Owned Small Business · Sedro-Woolley, Washington

UEI TUAFMNGTN7N6 **CAGE** 264M1 **Primary NAICS** 541511 **Size** Small business

COMPANY OVERVIEW

DataNova Consulting builds and runs automation, document processing and AI systems that stay on the customer's own infrastructure. We take a manual or broken workflow, automate it end to end, document it, and hand it over in fixed-scope engagements with one accountable owner.

CORE COMPETENCIES

- **Workflow automation & integration** — n8n, Python, REST APIs and webhooks connecting existing systems; ending manual data entry.
- **Private document intelligence** — OCR, semantic search, classification, data extraction and cited answers, with on-premises and fully offline deployment options.
- **Local language models** — speech-to-text, embedding and text-generation models running on laptops and small servers with no network connection.
- **Self-hosted infrastructure** — Linux, Docker, PostgreSQL, reverse proxies, secure remote access, monitoring and backups.
- **Applied AI & LLM integration** — AI assistants and agent workflows in business systems, with usage controls and audit logging.
- **IT and process consulting** — workflow assessments, automation roadmaps, documentation and staff training.

DIFFERENTIATORS

- **Data stays put.** Open-source, self-hosted designs: no new cloud vendor, no data leaving the agency's network unless required.
- **Fixed scope, fast delivery.** Small first milestones (days, not months) with written scope and price agreed up front.
- **We run what we build.** DataNova operates its own production automation, ERP, monitoring and AI agent platform every day.
- **Service-disabled veteran-owned**, owner-operated and directly accountable.

RELEVANT EXPERIENCE

- **Rook CEO** — DataNova's AI operations platform: multi-agent task automation with model routing, usage controls, monitoring and an external long-term memory service.
- **Therapize** — desktop application that transcribes session audio and writes structured clinical notes using models that run entirely on the user's laptop, offline.
- **Private document-intelligence pipeline** — intake, OCR, vector search and AI analysis over a private document set; store and search index on private infrastructure.
- **Production self-hosted operations** — 50+ monitored services (ERP, mail, workflow automation, analytics, vector database) with backups and secure remote access.

COMPANY DATA

Legal name	DataNova Consulting LLC
UEI	TUAFMNGTN7N6
